

BY THE HAND OF MAN

BY THE FORCE OF NATURE

A JOURNEY FOR THE IMAGINATION

Exhibits Development Group (EDG) and Our Place Global have come together in a collaboration to celebrate the UNESCO mission (United Nations Educational, Scientific and Cultural Organization) - to preserve and protect the world's greatest natural and cultural locations. *By the Hand of Man - By the Force of Nature* brings UNESCO World Heritage sites into the museum, providing a once-in-a-lifetime virtual visit to these locations offering audiences access to a magnificent collection of images of the World Heritage sites.

Selected from an exclusive collection of nearly 40,000 images taken at more than 375 World Heritage sites, *By the Hand of Man - By the Force of Nature* will amaze museum guests with an experience that is both unique and enthralling. Guests will be educated and, at the same time, entertained as they visit some of the most important and visually impressive locations on the planet.

With digital displays and accompanying audio, this all-encompassing exhibition will completely immerse the public in the visual splendor of the world's most iconic locations as well as some of the most hidden and unknown. *By the Hand of Man - By the Force of Nature* goes far beyond a standard photography exhibition as it aims to mesmerize and educate visitors, taking them on a journey of the imagination. Elegantly organized with accompanying interactive activities, visitors will engage with the exhibition's themes of *Courage and Conflict; Love and Beauty; Magic and Mystery; Power and Passion; Nature and Nurture.*
